Connecting to the Wireless Network with an Android Device

In order to connect to the wireless network at Trinity (TrinAir) on your Android Phone, you will need to follow the below setup instructions. After these steps have been completed once, your Phone should automatically connect in the future.

*ab12345 is a fake account

1. Select **Apps** from the main home screen

2. Select **Settings**

3. Select **Wi-Fi**

4. Select **TrinAir**

![Select Settings](image2.png)

![Select Wi-Fi](image3.png)

![Select TrinAir](image4.png)
4. The menu shown below will appear. Please enter the information shown below.

5. Your Android phone should automatically connect to the TrinAir network. If a registration window does not appear, proceed to step 6.

6. Open the Internet and go to any website. You will automatically be redirected to Trinity’s registration page.

7. On the registration page select “Students, Staff, and Faculty registration” by pressing Start.

8. Enter your Trinity Username and password in the following two boxes below. Press Download only once when finished, and wait for 45 seconds until the page loads. You will then be disconnected from the network for about a minute, and then reconnected automatically.

If you are unable to set up your account for any reason, please visit Trinity’s IT Helpdesk in the Library to get your phone connected, or call (708) 239-4858.
