How to connect to Trinity’s Wireless Network While Using a Macintosh

**Step One:** Click on the Air Port Icon usually located in the upper right portion of your screen. Make sure that the Air Port is turned on.

**Step Two:** Once the drop down menu appears, there will be several items to click on. Click on ‘other’

**Step Three:** Another window will appear with several blank spaces, enter the Network Name and Wireless Security as seen below.

Enter the following for your User Name and Password:

**Username:** Your Trinity ID (i.e. FL12345)
**Password:** Your Trinity Password

After you have inserted all of the information, click on the ‘ok’ button.
**Step Four:** Another window will appear. Click on the ‘Show Certificate’ button.

**Step Five:** The window will get larger. Click on the ‘Always trust these certificates’ checkbox and then click on the continue button.

![Image of a certificate window with the checkbox selected.]

**Step Six:** After the window closes, it will connect to the wireless internet. It may work immediately, however a system restart may be needed for your macintosh to authenticate onto the wireless system.

If you need help with these instructions, or suspect you are having problems with your wireless, you can contact Computer Services at (708) 239-4858.
